*"To build a city where it is impossible to build a city is  
madness in itself but to build there one of the most elegant  
and grandest of cities is the madness of genius."*

*Alexander Herzen*

## Palazzo Barbarigo della Terrazza

Theatricality, lyricism, brightness, vivacity and sensuality: a blue sky where myths, saints and families coexist linking the land with the celestial.

Mengardi is able to create a total harmony among the characters surrounded by candid clouds.

A window on the sky: the shapes flutter lightly. Everything framed with symbols: from the cherubs to the doves, emblems of the marriage lived with candour and feeling.

Giambattista Mengardi, *Allegoria Nuziale*, 1793, Secondo Piano Nobile, Palazzo Barbarigo della Terrazza.
